

# Help Make a Difference

The city of Rochester, Minnesota is looking for **volunteers** to help manage the community forest.

Trees benefit your city by providing clean air, rain water management, safety, and overall beauty that is special to your community. However, we need your help to plant new trees, provide water, and prune to promote good structure and keep our community trees healthy and safe.

## YOU can help with:

-  **Tree Plantings:** You will learn how to best plant trees
-  **Tree Watering:** You will learn how to install tree bags, when and how to fill the bags, and to watch for dry periods so new trees can thrive
-  **Tree Pruning:** You will learn how to best prune newly planted trees to make sure trees grow correctly and citizens are safe.
-  **Tree Steward Program:** You will learn what signs and symptoms to look for in trees that may be declining in healthy, to watch for vandalized broken or hazardous trees, and to provide information of the city if there is a tree of concern.
