

Fats, Oil and Grease Best Management Practices

FOG DO

- Place cooled oil and grease into trash bins or covered collection containers.
- Scrape food scraps into trash bins.
- Manually wipe off all visible fats, oils, grease, and food residue from dishes and cookware into trash bins.
- Use a strainer in the sink to collect excess food particles.
- Encourage others to help keep fats, oils, and grease out of the sewer system.

FOG DON'T

- Don't pour oil or grease down the drain.
- Don't put food scraps down the drain.
- Don't pour liquid foods (dairy products, syrups, batters and gravy, etc.) down the drain.
- Don't run water over greasy dishes, pans or fryers.
- Don't use chemicals to remove grease clogs; they can damage the piping system.
- Don't rely on a garbage disposal to get rid of grease.
- Don't put any greasy or fat-containing material down a sink that is not connected to a grease interceptor!
