

Eastwood Park - Site Plan

3330 Highway 14 East

Amenities

- A) Shelter
- B) Playground
- C) Horseshoes
- D) Baseball
- E) Volleyball
- F) Golf Course
- G) Parking for 50 cars
- H) Parking for 10 cars

Electrical

DO NOT OVERLOAD CIRCUITS!!!

Figure out the amps required for each appliance with the following formula:

$$\text{Amps(A)} = \frac{\text{Watts(W or VA)}}{\text{Volts(V)}}$$

Sometimes the amps may be listed on the appliance. Add together the amps from individual appliances in such a way to stay below the maximum limit per circuit. To be safe, stay 3-4 amps below the maximum, meaning 16-17 amps for a 20 amp circuit.
