

Silver Lake Park - Site Plan

West Silver Lake Drive NE

Amenities

- A) WEST Shelter & Restrooms
- B) Playground
- C) Horseshoes
- D) Baseball
- E) Pool
- F) Skate Park
- G) Parking (50 cars)
- H) Parking (114 cars)
- I) Parking (46 cars)
- J) Parking (49 cars)
- K) Parking (30 cars)
- L) Three Links Shelter
- M) East Shelter

Electrical

**DO NOT OVERLOAD
CIRCUITS!!!**

Figure out the amps required for each appliance with the following formula:

$$\text{Amps(A)} = \frac{\text{Watts(W or VA)}}{\text{Volts(V)}}$$

Sometimes the amps may be listed on the appliance. Add together the amps from individual appliances in such a way to stay below the maximum limit per circuit. To be safe, stay 3-4 amps below the maximum, meaning 16-17 amps for a 20 amp circuit.
